Make the Indian Summer Golden

Plant Your Trees and Shrubs this Autumn and Gain a Year in Results

LIBRARY RECEIVED

U. S. Department of Agriculture.

INJUN SUMMER

YEP, sonny, this is sure enough Injun summer. Don't know what that is, I reckon, do you? Well, that's when all the homesick Injuns come back to play. You know, a long time ago, long afore yer granddaddy was even born, there used to be heaps of Injuns around here—thousands—millions, I reckon, far as that's concerned. Reg'lar sure 'nough Injuns—none o' yer cigar store Injuns, not much. They was all around here—right here where you're standin'. Don't be skeered—hain't none around here now, leaseways, no live ones. They been gone this many a year. They all went away and died, so they ain't no more left.

But every year, long about now, they all come back, leaseways, their sperrits do. They're here now. You can see 'em off across the fields. Look real hard. See that kind o' hazy, misty look out yonder? Well, them's Injuns—Injun sperrits marchin' along an' dancin' in the sunlight. That's what makes that kind o' haze that's everywhere—it's jest the sperrits of the Injuns all come back. They're all around us now. See off yonder, see them tepees? They kind o' looks like corn shocks from here, but them's Injun tents, sure as you're a foot high. See 'em now? Sure I knowed you could. Smell that smoky sort o' smell in the air? That's the campfires a-burnin' and their pipes a-goin'. Lots o' people say it's jest leaves burnin', but it ain't. It's the campfires, an' th' Injuns are hoppin' 'round 'em t' beat the old Harry.

You jest come out here tonight when the moon is hangin' over the hill off yonder an' the arvest fields is all swimmin' in th' moonlight, an' you can see the Injuns and the tepees jest as plain as kin be. You can, eh? I knowed you could after a little while.

Jever notice how the leaves turn red 'bout this time o' year? That's jest another sign o' redskins. That's when an old Injun sperrit gits tired dancin' an' goes up an' squats on a leaf t' rest. Why, I kin hear 'em rustlin' an' whisperin' an' creepin' round among the leaves all the time; an' ever once in a while a leaf gives way under some fat old Injun ghost and comes floatin' down to the ground. See—here's one now. See how red it is? That's the war paint rubben off'n an Injun ghost, sure's you're born.

Purty soon all the Injuns'll go marchin' away again, back to the happy huntin' ground, but next year you'll see 'em troopin' back—th' sky jest hazy with 'em and their campfires smolderin' away jest like they are now.

WHY WE URGE FALL PLANTING

TREES COMPLETELY DORMANT. Hardy trees and plants are completely at rest in the Fall and can therefore be handled easily and safely. No quick awakening threatens to handicap work at any time, as nearly always happens in the spring, when the sap begins to run very suddenly.

SOIL IN IDEAL CONDITION. The soil is warm, mellow, easy to work and stored up with heat and fertility of a long growing season. So often in early spring the soil is cold, wet and unyielding.

AUTUMN ROOT GROWTH. The stored up heat coming out of the soil stimulates active growth, which continues until the ground freezes below the roots. As a result, trees become established before winter, ready to start into vigorous growth with the first touch of spring. The advantage is apparent when you stop to think that trees and shrubs make more growth during the very early spring than all the rest of the season combined. Fall planted trees begin to grow long before others could be planted in the spring.

QUICKER SERVICE. We have ample time in the fall to dig, select and pack your order with unusual care. You get the choicest stock from the new blocks of trees, delivered promptly and in the best of order. In the spring both nurserymen and railroads are crowded with the rush orders and delay sometimes results.

MORE TIME. You have plenty of time in the fall for thorough preparation and proper care. Fifty per cent of the failures are due to improper planting. Spring work presses so hard that planting is often done too hurriedly and trees are neglected.

TREES MATURE BETTER. Fall planted trees have a tendency to mature the foliage and stem early, going into winter in much better condition and suffering less from winter killing.

Mayo Nurseries, Inc., Rochester, New York

ELLWANGER & BARRY BLDG.

Mayo's Early-to-Bear Apple Trees

Choicest specimens for quick results—seven to nine feet high, four and five years old—heavily rooted—beautifully branched—symmetrical tops—fine big healthy trees which will please you

Rochester grown under severest weather conditions, these big trees will please you and be a source of satisfaction as long as you live. Planting such trees means rich, juicy apples without years of waiting and the joy of picking “Honest to Gosh” apples from your own trees on your own grounds, is incomparable.

If you want big apple trees for quick results, order today before our supply is exhausted. Each tree has been specially grown and pruned for specimens. We have done the years of waiting—the immediate enjoyment is yours.

We are offering a limited quantity of the following varieties in specimen trees 7 to 9 feet in height at \$2.50 each; \$25.00 per dozen; \$200.00 per hundred.

Summer Varieties

RED ASTRACHAN—Tree vigorous, upright, hardy and productive. Fruit medium to large; surface smooth, marbled and striped on greenish-yellow; flavor acid.

YELLOW TRANSPARENT—The tree is a hardy, upright grower; regular and early bearer, medium size. Color a rich, transparent yellow; flesh melting, juicy, subacid.

Fall Varieties

DUCHESS—A large, beautiful apple, roundish. Streaked red and yellow; tender, juicy and pleasant. Tree a vigorous, fine grower and abundant bearer. Very hardy. September.

FAMEUSE—Medium size, roundish; crimson. Flesh snowy white; very tender, fine juicy, mild, subacid; one of the finest dessert fruits. October and December.

MAIDEN BLUSH—Large, smooth, regular, evenly shaded red cheek; flesh white, tender, sprightly, with a pleasant subacid flavor; bears large crops. October.

Winter Varieties

McINTOSH—Medium large; smooth; yellow, covered with brilliant crimson; flesh snowy white, very tender, aromatic; subacid; very good quality. Tree vigorous; a good annual bearer! November to February.

GRIMES GOLDEN—This is one of the most popular apples in cultivation. Tree strong; thrifty grower; fruit yellow veined, russetted; flesh yellow, firm, quality rich. November and December.

BALDWIN—No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape than the Baldwin. It is esteemed as an eating apple, and for cooking. Large, bright red, crisp, juicy, and rich; tree vigorous, upright and productive. Keeps until April.

DELICIOUS—Flourishes well in every state. Bears annually; great yielder. Fruit very large; flesh fine grained, crisp, juicy, melting, delicious.

ROME BEAUTY—Large, yellow, striped with red, flesh juicy, crisp, subacid, tree moderate grower. October and December.

WINESAP—Large, roundish, deep red; medium quality; keeps well; tree is fair grower; good bearer. December to May.

Trees Like These

DELICIOUS

LAMBERTS appeal to the youngsters

The Cherry—made the pie famous

A Cherry Tree for Every Home should be a national motto. You will surely wish to plant some of our big supersize cherry trees this Fall. Each a specimen heavily-rooted and symmetrically branched. You can't buy cherries like these —

“YOU MUST GROW THEM YOURSELF”

You remember, of course, the big, fat rich cherries for which you climbed the tree when a boy. Why deprive your children and yourself of the same pleasure today? You can have all the rich, juicy cherries you want and have them quick if you will plant some of our magnificent bearing age trees

which we offer in the following varieties. Each tree has been grown, cultivated, and pruned for a specimen. All the trees run 6 to 8 feet in height symmetrically branched, heavily rooted trees that save you two seasons of waiting and which will repay you richly in satisfaction.

The Super-Cherry—LAMBERT

The Tree—In the years following planting the Lambert develops into a very beautiful tree, being a strong, rugged, vigorous grower, with dense healthy foliage; for this reason it is a valuable acquisition as a shade tree.

Its Yield—No cherry can equal the Lambert with its tremendous crops of delicious fruit.

The Fruit—The Lambert Cherry to eat will give your palate a new sensation. The flesh is firm, crisp, and deliciously rich, with juice that has a delightful tang all its own. When fully

ripe it is unusually large and of a dark lustrous purple color.

NAPOLEON—A rich, delicious variety; large red cherry that hangs well on the tree. Very popular. It is tender, and one of those famous varieties that has made Cherry growing popular. Clear red in color. June.

YELLOW SPANISH—A magnificent heart-shaped Cherry of the largest size, pale yellow, richly dotted and spotted with deep red. Flesh very firm, juicy and sweet; a rapid grower and immense bearer; best for canning, preserving and shipping. July.

Sour Cherries for Pies and Canning

EARLY RICHMOND—Everywhere the most popular. Tree strong thrifty grower; fruit medium size, dark red, melting, juicy; sprightly acid flavor; especially valuable for cooking purposes; early and abundant bearer. Season, last of May and first of June.

LARGE MONTMORENCY—An old favorite, Large, bright, clear, shining red; flesh solid, juicy, rich, acid; tree prolific bearer and very hardy.

We have a limited number of fine, healthy Early-to-bear Trees, well branched and rooted, of above five varieties.

6 to 8 feet in height, \$3.00 each; \$30.00 per dozen.

SECKELS—*bring back memories of long ago*

Rich Juicy Pears—and lots of them

on your own grounds. Don't wait a life time for results—plant our large specimen early-to-bear trees which we are offering to our patrons this Fall—trees that are a horticultural achievement—trees that will save you seasons of waiting for pears of delicious flavor. The following list of varieties are the very best for home table use and being Rochester grown are of iron clad hardiness. If you want big fruit trees for quick results—order today!

Summer Varieties

BARTLETT—No pear of the same season equals the Bartlett in flavor, either for eating or canning. Fruit large and yellow, fine grained, buttery and juicy. Sweet, rich flavor. Tree is hardy, grows very rapidly and bears young and heavily. Carefully cultivated and sprayed trees will produce enormous crops of perfect fruit. Season, September.

CLAPP'S FAVORITE — Large, fine; pale, lemon-yellow, with red cheek; fine texture, melting, buttery, juicy, with a rich, sweet, delicate vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

Fall Varieties

SECKEL—A beautiful and delicious little Pear that is the standard of excellence. One of the richest and highest flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a stout and erect growth. September and October.

DUCHESSE D'ANGOULEME—A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. October and November.

Le Conte Bearing Pear Trees

We have a limited quantity of some big bearing trees of the LeConte variety of pear. This is an exceedingly large pear, smooth, pale yellow, quality good, juicy and pleasant. The pear is remarkably vigorous, healthy and free from blight. It is an extremely prolific bearer. These trees have already borne fruit in the Nursery row. These big trees run about 8 to 10 feet in height, beautifully branched, heavily rooted.

Splendid early-to-bear trees, the choicest in our nurseries.

Heavily rooted, beautifully branched, \$3.00 each; \$30.00 per dozen.

Price, \$5.00 each;

\$50.00 per dozen.

BRADSHAWs—*the answer to little Jack Horner*

Raise Your Own Plums—

that are a treat to the taste, a joy to the eye

Superb early-to-bear trees for quick results. Symmetrical tops—beautiful fibrous root system—smooth trunks, which are the foundation for successful results. Plant these trees and save the difference in time. The following varieties are the very best for the home garden and of dependable hardiness.

European Plums

BRADSHAW—A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; the quality is excellent. It ripens ten days to two weeks later than Abundance.

LOMBARD—Medium to large, roundish, oval, dark red, flesh yellow, juicy and pleasant flavor; hardy, popular, nearly always producing a crop, a valuable commercial sort. August.

SHIPPER'S PRIDE—Large and handsome, dark purple; quality fine, juicy, and sweet; excellent for canning. September.

SHROPSHIRE DAMSON—Large, amber color, juicy and sprightly; most desirable of the Damson class; productive and not liable to rot; good commercial sort. September.

IMPERIAL GAGE—Rather large; oval; greenish; flesh juicy, rich and delicious; parts from the stone. Tree a vigorous grower; very productive; and one of the best plums. Middle of August.

Mayo Nurseries, Inc.
Rochester, N. Y.

Lake Forest, Ill.

Gentlemen:

"Enclosed please find check for \$57.50 in full settlement of your account.

The young trees received from your Nursery were the finest stock we have ever received, beautifully grown and in perfect condition.

(Signed) Mrs. Robert B. Dickinson."

Japanese Plums

ABUNDANCE—Fruit large, showy, beautiful. Amber, turning to a rich, bright cherry color, with a decided white bloom. Flesh light yellow, exceedingly juicy and tender, of a delicious sweetness impossible to describe. Its season is very early, ripening in advance of other plums, thus adding to its special value.

RED JUNE—The best Japan plum, ripening before Abundance. Medium to large; deep vermilion-red, with handsome bloom; flesh light lemon-yellow, firm, moderately juicy; fine quality. Tree upright, spreading vigorous and hardy; productive.

Extra Select Specimens—6 to 8 feet—the finest in our Nurseries.

Beautifully branched, heavily rooted, \$3.00 each; \$30.00 per dozen.

CRAB APPLES *make the most delicious jelly*

Bearing Trees Crab Apples

for Cider and Jelly

For making Cider, Jellies and Preserving, the Crab Apple is unequalled among fruits. The Crabs are especially noted for their great hardiness and vigor, growing well and producing heavy annual crops under almost any condition and in practically any location. They come into bearing unusually early—generally the second year. The great beauty of the Crab Apple tree in blossom is an added advantage, which makes it very attractive for yard planting, the tree being a mass of fragrant flowers in the spring.

We offer two splendid varieties, as follows:

TRANSCENDENT—Bright red, immensely productive, early.

HYSLOP—Large, deep crimson, late variety.

**Price, Extra Fine Five Year Old Trees, 7 to 10 Feet,
\$3.00 each, \$30.00 per doz.**

Bearing Quinces

DELICIOUS BAKED QUINCES—Grown in your own yard.

A space 10 x 10 is plenty for a quince tree. Absolutely hardy and needs little or no care and attention. There is, therefore, no reason in the world for not growing bushels and bushels of the finest quinces you ever ate. We recommend the Orange variety, which is bright, orange-yellow in color, nearly

round in form and of highest quality and is best for the home garden. We heartily recommend it to our patrons.

Strong, three year trees, symmetrically branched, beautiful rooted, which have already borne fruit in Nursery. \$2.00 each, \$20.00 per doz.

Specimen Tree Gooseberries

Bearing plants—first time offered—only a limited quantity available this fall—order today

In connection with our sale of tree currants the last three years, we have had a great many requests for tree gooseberries. Three years ago we started a planting and this Fall we will have some beautiful, specimen tree gooseberries to offer for the first time. The tree gooseberry is common in English landscapes, but practically unknown in this country, owing to the lack of stock. We believe this is the first time they have ever been offered for sale. Each tree gooseberry bears great clusters of the highest quality of fruit, and being off the ground not only makes it easy to pick and handle, but also keeps the fruit clean and fresh. The tree gooseberry also makes a charming appearance in the garden or about your grounds, being extremely ornamental and will advantageously take the place of a shrub or dwarf tree so that each year you can pick quarts of delicious, juicy fruit for preserves and jelly instead of "just leaves." The gooseberries that we are offering are all of the Poorman variety, which is very productive and not susceptible

to mildew. The fruit measures over an inch in length and almost one inch through, oval, pinkish-red when ripe, quality excellent, considered the best of the sixty-two varieties grown at the New York State Experimental Station, which in itself is highest recommendation.

We hope that each of our patrons will try out a few of these charming little trees some place about their grounds. Their beauty, charm and utility will return a great deal of pleasure and satisfaction for the effort expended in planting. If planted this Fall, these specimen tree gooseberries, which have already produced fruit in the Nursery row, will produce an abundance of fruit next summer.

These trees are three to four feet in height, branched and well rooted, \$3.00 each, \$30.00 per dozen. Each tree has its roots balled in moss to insure absolute safety in transportation.

Some of Our Own

Old fashioned

BLUEBERRIES

PRICES

We have some extra fine Nursery grown plants, beautifully rooted, balled and bur-lapped, \$1.50 each, \$15.00 per doz., \$100.00 per 100.

View showing some of our nursery-grown Blueberries. Insert: One of the plants—Note the root system holding this ball of earth—in the nursery row and already fruiting!

Old Fashioned Blueberries

Yes, old-fashioned blueberries—just like Dad had on his old farm down East. You can't buy berries like these—you must grow them yourself—saving you time, labor and disappointment, if you get the real Nursery-grown blueberry plants.

The blueberry is among the finest of fruits, in fact, the very finest of all berries for pies. It is almost unknown in the average garden. This is due largely to the scarcity of Nursery grown plants, the only kind that transplant easily. Blueberries bear the first or second season after planting, in fact, most of the plants we offer have set fruit in the Nursery row.

Blueberry pie, blueberries in cream, blueberry preserves. The thought of these makes the mouth water and yet they are within your reach in an ever increasing quantity. It is almost impossible to find a description of the blueberry's flavor. The blueberry is in a class by itself, with its delicious melting flesh, full of rich creamy juice and a delicate wild tang all its own.

In the autumn the blueberry is of great ornamental value, the foliage being more brilliant than practically any other shrub and their red twigs brighten up the winter landscape.

Our blueberries are the famous New England type, grown in the heart of the Berkshire Hills, where winter temperatures of thirty to forty degrees below zero occur, and their hardiness is unquestioned. This is an important point to take into consideration in buying blueberries. We do not sell hybrid blueberries; ours are the New England "just blueberries," producing fruit such as most of our patrons have had an opportunity to taste at some time or other in blueberry pie, once eaten, never

forgotten, and leaving a great desire to grow them in your own garden.

All our blueberries have been transplanted and hence have excellent root systems. Each plant is dug with earth attached to roots and a ball of earth sewed in burlap in order to eliminate risk in transplanting. Plant blueberries four feet apart.

We have some extra fine Nursery grown plants, beautifully rooted, balled and burlapped, \$1.50 each, \$15.00 per doz., \$100.00 per 100.

Cultural Directions

Blueberries require an acid soil to produce the best results. This is prevalent in many sections of the country. Where your soil is not acid, we suggest the following method to get the most from your plants. Choose a well-drained location, easily supplied by water during the dry summer months. Blueberries do best with full sun, although they will grow and produce fruit in partial shade. In order to get the proper acid condition to your soil, mix partly rotted leaves with the soil of your garden. A heavy mulch each fall of partly rotted leaves will maintain the acidity of the soil. Do not remove this mulch, but let it remain throughout the year. Another easy method to obtain acidity to the soil is to obtain partly rotted sawdust or wood chips. This makes excellent material and produces an acid condition very beneficial to the plants. Acid fertilizers can be used if the above two methods are not possible. The Department of Agriculture recommends as the best chemical fertilizer aluminum sulphate, which is an effective and inexpensive method of changing neutral soil to acid, half a pound per plant may be advantageously applied. Never use manure or compost near a blueberry plant. No pruning is necessary except as a branch may become damaged or stop bearing. Water your plants well the first year, soaking the ground two or three feet away from the roots. For this, the plants will thank you, we will thank you and finally you will thank yourself.

A New Variety—Thoroughly Tested

Pedigreed Mary Washington Asparagus

The best high producing, tender, green Asparagus for market and home use

There is no variety of asparagus as good as the Washington and no strain of the Washington to be compared with the "Mary." The female "Mary" Washington asparagus like the original male Washington is the greatest find in the history of asparagus breeding. It is earlier, produces more asparagus, has larger and more tender stalks, and possesses higher rust resistance than any other variety. Mary Washington asparagus is recognized as the best and we are pleased to announce that we can now offer you selected roots grown from the seed of this asparagus, produced from a fine field of second generation Mary Washington. Mary is so much better that it will probably displace most of the other varieties now grown in the garden.

We have a limited quantity of beautiful, two year old roots, pedigreed stock only, which we can offer for this Fall at the following prices—\$8.00 per 100, 50 plants at the hundred rate

A dish of Golden Queen for breakfast—no sugar needed

GOLDEN QUEEN

The Most Delicious of All Yellow Raspberries

Finest for the Home Garden

Give your palate a new sensation

For those who have never tasted a Yellow Raspberry, the Golden Queen will be a delightful surprise, with its delicious, melting flesh, full of creamy juice. It is an ideal variety for the home garden.

It is a beautiful berry in appearance, being of the largest size, and a beautiful golden orange color. It is a vigorous growing plant, hardy, and extremely productive. This is not a new variety, but one that has been thoroughly tested out, and we cannot say too much in its favor. For a table berry it has no superior. It is a seedling from the splendid Cuthbert, and is to the Yellow Raspberry what the LaFrance is to the Red.

We have some splendid bearing plants with fine heavy stalks excellently rooted, real specimens that will produce berries for you next summer.

Price—Per dozen, \$5.00; per hundred, \$40.00. Golden Queen are extremely scarce this Fall.

WILL YOU LIKE THE GOLDEN QUEEN RASPBERRY?

“Wilton, Conn., September 25, 1924.

Mayo Nurseries, Inc.
Ellwanger & Barry Building, Rochester, N. Y.

Gentlemen:

Enclosed please find check to cover order for three dozen Golden Queen raspberries, three dozen Blowers Big Blackberries and one dozen Honey Sweet Black Cap Raspberries.

You will be glad to know that your goods sent me last fall came up to the same high standards that my other orders from you have reached. Of the order of grape vines (twenty, I think) all lived but one and they have made wonderful growth and seem sturdy beyond belief. The Golden Queen raspberries are the finest berry I have ever tasted. That seems a broad statement but I shall have to stand by it. We planted them on a hilltop in the garden where they have all the sun there is, and they were almost as big as strawberries.

With all good wishes,

Truly yours,

(Signed) Zelda Sears Wiswell.”

LaFrance Giant Everbearing Red Raspberry

Big, rich, sweet, juicy berries from July until November. Awarded first class certificate of merit by the Massachusetts Horticultural Society, New York Horticultural Society, New York Florist Club, Horticultural Society of Nassau County, Horticultural Society of Westchester County, Tarrytown and many others. This is truly a remarkable record.

The bushes of this remarkable raspberry are rapid, vigorous growers, often reaching a height of nine feet. The canes are strong and erect, frequently an inch or more in diameter with fewer spines or thorns than any other raspberry. This makes berry picking comfortable. The canes branch freely, adding greatly to their productivity.

LaFrance is a prodigious bearer throughout the season, from late June until all vegetation is killed by frost.

The berries are firm, twice the size of other raspberries, wonderfully delicious in flavor; the size of the berry and its flavor are the same from first to last. The late crops, when raspberries are scarce and therefore highly priced, are heavier than the earlier ones.

The LaFrance is all "meat"; not all seeds.

LaFrance Red Raspberry fruits early in July the first season planted, continuing throughout the growing season; after being established they will bear as early as June and as late as November last and later, so long as heavy frost has not killed all vegetation.

LaFrance is free from insects and diseases and multiplies rapidly; while in the East and other parts of this country it reproduced itself tenfold in one season, in the State of Washington it has reproduced itself twentyfold.

LaFrance is perfectly hardy and has been thoroughly and successfully tested in various parts of the country.

In the Northwest, the great berry growing section of America, growers are most enthusiastic over LaFrance and are planting it heavily.

Splendid, well rooted transplants, extra fine tops, which will bear berries next Summer, if planted this Fall. Price—\$4.00 per dozen, \$30.00 per 100.

Blowers Big Blackberries

Biggest and Best of All Blackberries

RECORD—14 feet and 1 inch extreme height of bush. 2694 berries on one bush. 2720 quarts from one third acre.

ON SEVEN ACRES—30,206 quarts; 45,307 lbs.; 934 $\frac{1}{16}$ bushels; 22 $\frac{2}{3}$ tons \$2,121.75.

NET F. O. B. HERE—\$303.10 average per acre. 153 bushels netted \$344.25 from best acre.

The Quality—Its sprightly, yet moderate acid taste, is indicative of the presence of those valuable medicinal properties without which the blackberry is worthless. A large, clean, bright berry. The fruit is exceedingly sweet, with no perceptible core when fully developed. The flavor is pleasant without being peculiar. In fact, it is a blackberry from root to tip. It is a first-class shipper, standing up well for several days. Its marvelous size and splendid flavor have called forth the following comments by those who have observed it: "We are surprised to see the mammoth growth of bush and berry." "Most splendid fruit as to size, color and quantity that ever grew on blackberry bushes." "The berries are large and handsome and the flavor good." You can only appreciate the fruit by seeing our "berry orchard" in fruiting.

Hardiness—Plant Blowers Blackberries anywhere you would grow Concord grapes.

Distance Apart to Plant—Rows 8 feet apart, 3 feet in row. This takes about 1800 plants to the acre.

Season of Fruiting—The season of ripening is from July 25th until frost; the bulk of the crop matures in the month of

August. The yield in September and October depends upon the season; very few in October. We have had blossoms and ripe fruit in November.

We offer extra fine two year old Transplants, which will produce next summer.

Price—\$3.00 per doz., \$20.00 per 100, \$150 per 1000.

TREE CURRANT—*a charming solitaire for your garden*

SPECIMEN TREE CURRANTS

Bearing Trees—Something New

Why not plant a charming little tree currant in place of a shrub or dwarf tree and each year pick quarts of delicious juicy fruit for preserves and jelly instead of "just leaves?"

While the tree currant is a new introduction to this country, it is extremely desirable and useful both on account of its great beauty and tremendous crops. As can be seen from the accompanying illustration, each tree bears great clusters of the highest quality of fruit, and, being off the ground, not only makes it easy to pick and handle, but also keeps the fruit clean and fresh.

Furthermore, the tree currant makes a most charming appearance in your garden or about your grounds. These little trees are used extensively in England and France but the lack of stock has prevented their planting in the United States. We are fortunate in being able to offer to our customers for

this Fall only a limited quantity of beautiful tree currants. These are all of the Perfection variety which is the best for jelly and preserving. This variety bears enormous crops of the most delicious fruit. We hope that each of our patrons will try out a few of these charming little trees some place about their grounds. Their beauty, charm and utility will return a great deal of pleasure and satisfaction for the effort expended in planting.

If planted this Fall these specimen Tree Currants will produce fruit next summer.

These trees stand about 3 to 4 feet high, branched and well rooted, \$3.00 each, \$30.00 per doz.

Each tree has its roots balled in moss to insure absolute safety in transportation.

LANDSCAPE DEPARTMENT

*"That the ground surrounding your home
may be of unusual beauty the year 'round"*

OUR Landscape Department will appeal to all, whether owning a country home, city home or large estate; whether you have built or are building—or have just purchased your property. It consists of competent landscape engineers and architects of life-long experience in solving planting problems of all kinds and in practical work at the Nurseries, the main purpose being the most beautiful and harmonious surroundings for the least consistent expenditure. Our men are experts in shrub and evergreen planting—old fashioned gardens and rockeries—in woodland planting with the arrangement of Mountain Laurel, Rhododendron and Azaleas—in the construction and planting of bridle-paths, artificial lakes, brooks, waterfalls, fountains and caverns—in the creation of new and unusual vistas and of novel landscape effects in all corners of your grounds.

This service is yours without cost; for we are primarily Nurserymen and wholly interested in the sale of the finest trees, shrubs and plants that can be supplied or procured. To further the sale of specimen Nursery stock of all kinds and to save our customers the tremendous loss and waste which comes from ill-thought-out arrangements or from inexperienced men, we have developed one of the best equipped, most unusual and most efficient landscape services in this country. Our experts are prepared to make professional visits for consultation and advice, to make surveys, plans and designs and to undertake the entire construction and carrying out of landscape work of all descriptions. Our charges for consultations are nominal, merely to cover the actual expense from Rochester.

The advantages of dealing with one concern for your entire work are great, as our pride is in the quality of the Nursery stock that we supply for landscape work and the ambition of our engineers is in making Mayo Service the finest and the Mayo trees and plants produce the best results that can be obtained.

We supervise personally all our landscape plantings and, if necessary, will furnish specially trained labor and equipment, relieving our customers of every care, bother or trouble in the planting and arrangement of their grounds. Correspondence with those having new grounds to lay out and plan, or unsatisfactory old grounds to make over, is solicited. Write or 'phone us for an appointment.

TERMS

All shipments are F. O. B. Rochester, and include packing. We are always glad to open accounts with persons or firms who desire to do business with us.

Special Discount Applying to all Prices in this Catalog

While our prices are F. O. B. Rochester, there are a large percentage of our customers who prefer to send cash with order. Where cash does accompany order we will allow you to deduct 10% of the amount of your order. This, in most cases, will cover the cost of transportation.

MAYO NURSERIES, Inc., Rochester, N. Y.
